Cyber Security : System Adminstration and Hardware Basics

Day 3

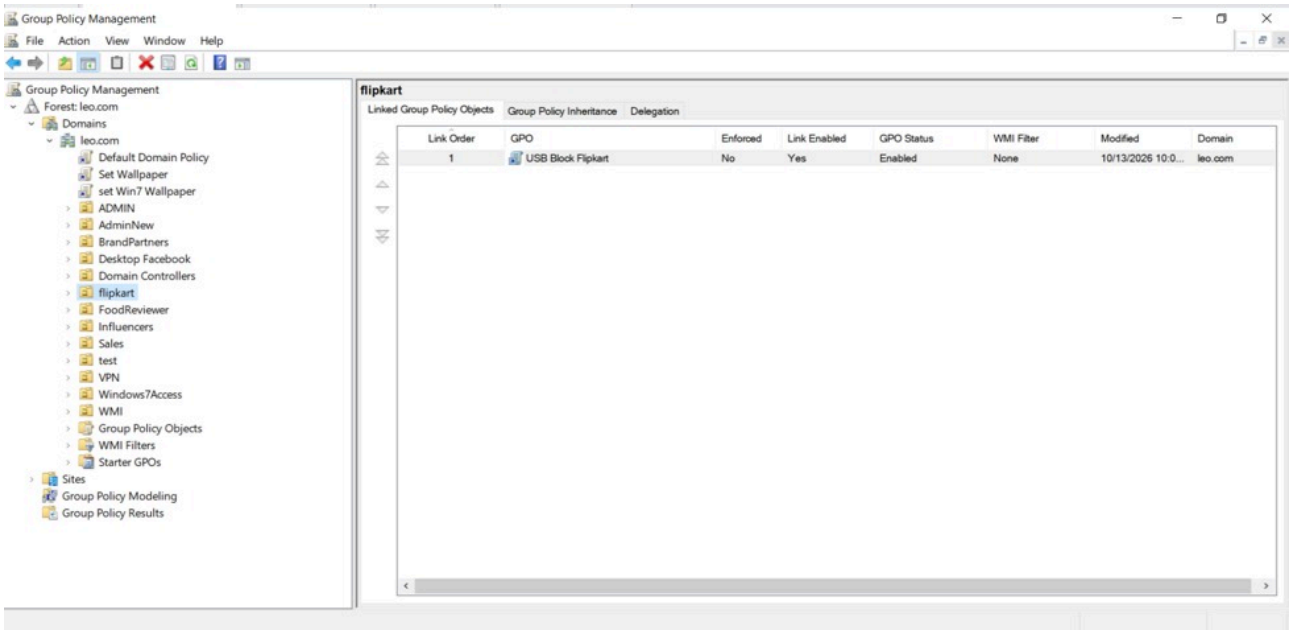

Task 1

Task 2 & 3

Task 4

Task 5

1. **Customer**: Should be able to view and track only their own orders and saved addresses. They should not be able to see other customers' order history or personal details.
2. **Restaurant owner/partner:** Should be able to edit their own menu, prices, and availability, and view their own sales reports. They should not be able to access the dashboards or payout data of competing restaurants.
3. **Delivery partner:** Should be able to see the pickup and drop-off details for an order only while it is assigned to them. They should not retain access to the customer's phone number or address once the delivery is completed.
